<h2>User Story Review and Analysis</h2>

<h3>Parameter Scores</h3>

Parameter	Description	Score (out of 20)
Clarity	The story lacks detail and is ambiguous, making it difficult to understand the requirements.	6
Completeness	The story is incomplete, missing essential elements such as acceptance criteria, preconditions, and description.	4
Business Value Alignment	Although the story is related to the healthcare domain, its relevance and value are unclear due to the lack of detail.	10
Testability	The story is not testable in its current state, as there are no clear requirements or acceptance criteria.	5
Technical Feasibility	The technical feasibility of the story is uncertain due to the lack of information about the requirements and constraints.	8

<h3>Overall Quality Score</h3>

The overall quality score for this user story is: **33 / 100**

Expose API

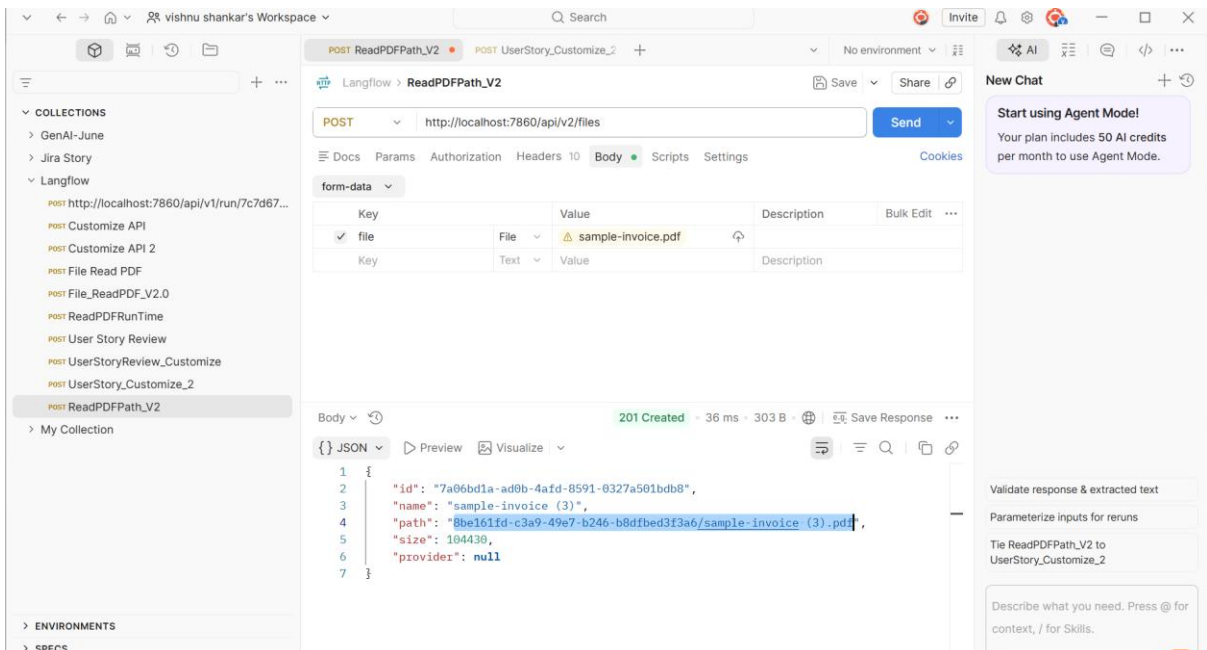

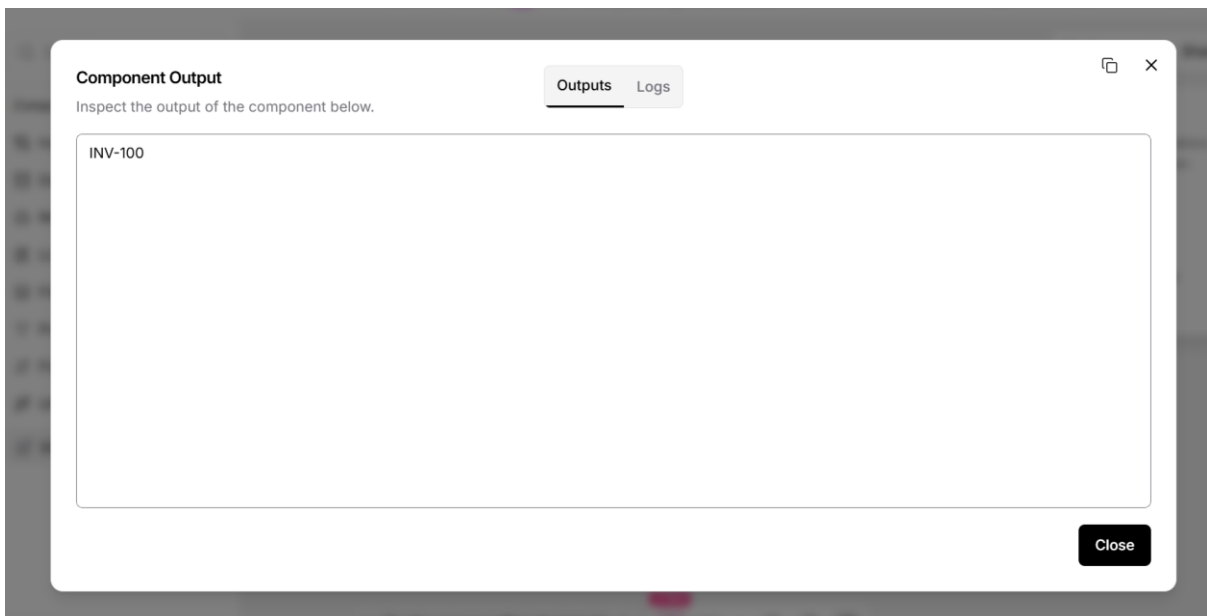

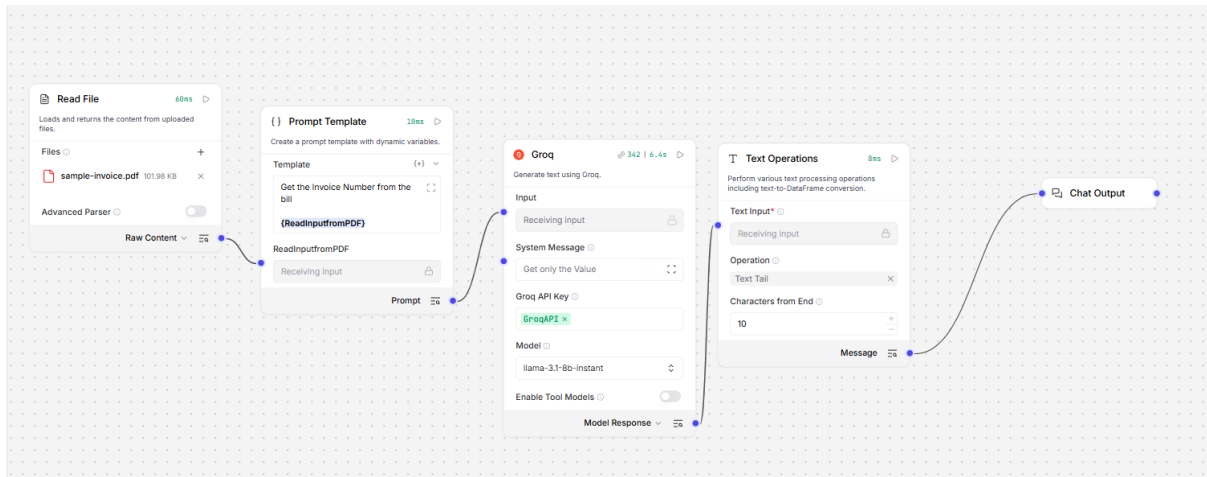

Select which component fields to expose as inputs in this flow's API schema.

	N	Number of chat completions to generate for each prompt. Note that the API may not return the full n completions if duplicates are generated.	0
	Model	The name of the model to use. Add your Groq API key to access additional available models.	llama-3.1-8b-instant
	Enable Tool Models	Select if you want to use models that can work with tools. If yes, only those models will be shown.	☐

The screenshot displays the Langflow workspace with a workflow titled "UserStory_Customize_2". The workflow is a POST request to the endpoint `http://localhost:7860/api/v1/run/f68c5fd9-8a0d-4871-9150-1e5b2b8c27cc`. The request body is in JSON format, containing an `output_type` of "text", an `input_type` of "text", and an `input_value` of "JIRA-22". The workflow uses two models: "llama-3.3-78b-versatile" and "llama-3.1-8b-instant". The response is a 200 OK status with a body containing a JSON object with a `score` of 84 and a `text` field. The text field contains a detailed analysis of a user story, including sections for "story is straightforward but lacks detailed acceptance criteria", "Preconditions not clearly mentioned", "Business Value Alignment", "Strong healthcare relevance and compliance focus", "Testability", "Can be tested through prescription workflow automation", "Technical Feasibility", "Technically feasible with EHR integration", and "Improvement Areas". The interface also shows a sidebar with collections, environments, and specs, and a right-hand panel for adding visualizations and scripts.
